Question Scoring Model

Dimension	Points	Question Addressed
Accuracy	0-4	Are the conclusion and the relevant details correct?
Groundedness	0-3	Is every claim supported by real evidence?
Completeness	0-2	Does the response fully answer the question?
Clarity and Precision	0-1	Is the response specific and understandable?

Accuracy: 0-4 points

Score	Decision Rule
4	The correct conclusion is reached. No contradictions are present.
3	The correct conclusion is reached with a small error.
2	Meaningful correct content exists, but an error or omission affects the answer.
1	Only a small portion of the response is correct. Important details are incorrect or missing.
0	A wrong or contradictory conclusion is made, a definitive answer to an unanswerable question is given, or no response is provided.

Groundedness: 0-3 points

Score	Decision Rule
3	Every claim is supported by timeline events, file paths or timestamps, or documented evidence limitations.
2	The answer is supported, but one minor unsupported interpretation is added.
1	Important claims rely on assumptions instead of evidence from the given timeline.
0	The conclusion is not supported, is contradictory to provided evidence, or is asserted despite the evidence being unable to answer it.

Completeness: 0-2 points

Score	Decision Rule
2	All required fields or events are included. The response follows the requested scope and constraints.
1	Mostly correct but missing a relevant event, rationale, or evidentiary limitation.
0	Incomplete, nonresponsive, or largely outside the requested scope.

Expected Completeness by Question Type

Category	Minimum Complete Answer
Lookup	The file path, event type (when requested), and time are all present.
Summary	All listed events are in scope, in the correct chronological order, and no invented activity appears.
Unusual Activity	A conclusion, relevant supporting events, and an explanation of why the activity is noteworthy are all present.
Counting	The correct total and supporting evidence consistent with the total are provided.
Unanswerable	A clear statement that the answer cannot be determined and an explanation of why the evidence is insufficient are provided.

Clarity and Precision: 0-1 point

Score	Decision Rule
1	The response uses file paths and timestamps (when required). Evidence is differentiated from interpretation.
0	The response is vague, contradictory, or imprecise about file paths or timestamps.

Grading Rubric per Question

Dimension	Score	Comments
Accuracy	__/4	
Groundedness	__/3	
Completeness	__/2	
Clarity and Precision	__/1	
Total Score	__/10	

Grading Rubric per Timeline

Category	Score	Comments
Lookup Score	__/40	
Summary Score	__/40	
Unusual Activity Score	__/40	
Counting Score	__/40	
Unanswerable Score	__/40	
Total Score	__/200
